

## Repatee for Windows Unified Messaging System

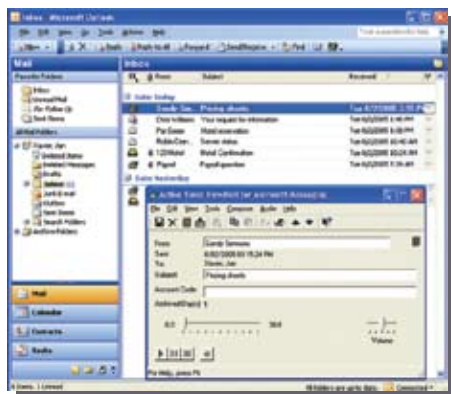

Imagine having instant access to every voice, fax and e-mail message you receive no matter where you are. Imagine being able to manage and respond to messages by using simple voice commands or a click of the mouse. Imagine printing directly to a fax machine or handling live incoming calls from a PC without even picking up a phone. Imagine a world in which you never miss opportunities because you can now respond faster to your customers' requests. That's the power of Active Voice's Repatee® Unified Messaging System.

### The Freedom of a Single Mailbox

Repatee offers advanced unified messaging, voice mail and automated attendant functionality, helping your organization become more responsive. Designed to work with the applications you use every day, Repatee integrates with LANs, giving you control over live telephone traffic and messages from your desktop. Through its optional suite of unified messaging and desktop call management applications, Repatee provides you with the most complete unified messaging solution available.

### Impressive Features

**Speech Recognition** is a breeze to use. Navigate your Repatee mailbox and change personal settings by speaking simple commands into any telephone.

*Repatee provides a complete unified messaging solution that works well with everyday applications.*

**Text-to-Speech** gives full access to e-mails without a laptop or modem. Manage e-mail over the telephone just like voice mail. Reply, forward, save and delete emails by using simple voice commands or through the keypad on the telephone.

**Remote Networking** is supported between the office, home and the road — ideal for companies communicating via long distance with regional offices, vendors, or customers who have multiple remote systems.

Active Voice is a global leader in Unified Messaging. Our products empower people to communicate and manage information with convenience and efficiency using virtually any communication device to access and control their messages, data and real-time communications in a unified and easy-to-use way. With over 200,000 systems sold in more than 60 countries, Active Voice products fit into a wide variety of business environments across a broad range of industry sectors.
